# WKCE show upward trend for mathematics, stable scores for reading Three-year trend shows positive movement on closing achievement gaps 

MADISON—Results for statewide testing show an overall upward trend for mathematics, stable scores in reading, and a slight narrowing of several achievement gaps. This three-year trend comes at a time when poverty is continuing to increase among Wisconsin students.

The 434,507 students who took the Wisconsin Knowledge and Concepts Examinations (WKCE) and the Wisconsin Alternate Assessment for Students with Disabilities (WAA-SwD) this school year showed gains over the past three years in mathematics in six out of seven grades tested. Reading achievement at the elementary, middle, and high school levels was stable over three years. An analysis of all combined grades indicates a narrowing of some

| 8 | 84.42 | 75.32 |
| 10 | 74.62 | 69.36 |

NOTE: Achievement is the percentage of all students with a Racial/Ethnic Group code who scored proficient or advanced. achievement gaps by racial/ethnic group.
"These three years of assessment data show some positive trends. While some results point to achievement gains, we must continue our focus on closing achievement gaps and raising achievement for all students," said State Superintendent Elizabeth Burmaster.

Poverty rates for students tested rose again in 2007-08 from previous years. Statewide, 33 percent of students tested are from economically disadvantaged families, making them eligible for free or reduced-price school meals. Black students experience the highest poverty levels, with 76 percent from economically disadvantaged families compared to 22 percent of white students. For Hispanic students, 73 percent are from low-income families. The gap in the

| school meals. |  |

(more)
percentage of students scoring proficient or advanced between economically disadvantaged students and their peers ranges between 11 percentage points and 35 percentage points across all tests. Over the past three years for economically disadvantaged students and their peers in all grades combined, the gap narrowed in mathematics by 4 percentage points and widened by 1 percentage point in reading.
"The adverse effects of poverty work against our students and their learning," Burmaster said. "Improving achievement in our schools requires shared responsibility among teachers and families as well as business and elected leaders to create communities that support academic achievement."

At the elementary level, 82 percent of students scored proficient or advanced in reading and 76 percent in mathematics on the 2007-08 assessments. In middle school, 85 percent of students scored proficient or advanced in reading and 76 percent in mathematics. For high school students, 75 percent reached those achievement levels in reading and 69 percent in mathematics. The three-year trend points to higher mathematics achievement at elementary and middle school and

| Elementary | 72 | 75 | 76 |
| Middle | 74 | 77 | 76 |
| High School | 72 | 71 | 69 | a decline in high school. At all levels, reading achievement is stable.

In achievement gap analysis by racial/ethnic group of student results for all grades combined, the three-year trend shows a narrowing of the gap in mathematics between white students and Hispanic students by 4 percentage points and 3 percentage points for Asian students. The gap between white students and American Indian and black students in mathematics narrowed by 2 percentage points. The same analysis shows a narrowing of the gap for reading between white students and Hispanic students (by 2 percentage points) and Asian students (by 1 percentage point). Achievement gaps in reading have not changed for black students and widened by 1 percentage point for American Indian students.
"Our New Wisconsin Promise ensures a quality education for every child," Burmaster said. "We must provide early learning opportunities, small class sizes, and quality educators in every classroom. While our schools cannot solve all of society's problems, they must be centers of learning equipped with the staff and resources needed to support academic achievement and prepare students for their roles in work, family, and the community."

To meet requirements of federal education law, the Department of Public Instruction administered the Wisconsin Knowledge and Concepts Examinations (WKCE) and the Wisconsin

Alternate Assessment for Students with Disabilities (WAA-SwD) this school year. This is the third year of statewide testing in grades three through eight and grade 10. Nearly every student in the tested grades took exams in reading and mathematics. Students in grades four, eight, and 10 also took exams in language arts, science, and social studies.

Results from the WKCE/WAA-SwD will be used for federal No Child Left Behind accountability purposes in the state's annual adequate yearly progress (AYP) evaluation. Schools and school districts will receive preliminary notification of their AYP status in June.
