Re: Turnover Data

Enclosed are detailed reports that summarize employee turnover data over the last 5 years. The data is categorized by school location and employee type, with comparisons in each category to the total of all school locations at the same level (elementary, middle or high).

For example, the total/percentage of teachers who transferred out of Allis in 2005-06 is listed, as compared to the average percentage of teachers who transferred during that year, at all other elementary schools.

The following charts summarize a portion of the data contained on the enclosed detailed reports related to turnover and transfer activity of teacher unit staff during these years.

2005-06 Teacher Transfers – Elementary School Level

During the 2005-06 school year the average percentage of teacher unit staff who transferred at each elementary location was 10.92% (transfer is movement to another position within MMSD). The elementary school with the highest percentage of teacher unit staff transferring to a new location during the 2005-06 school year was Emerson at 18.42%. The elementary school with the lowest number of teacher unit transfers during 2005-06 was Crestwood at 4.76%.
