

November 4, 2010

**TO:** Board of Education

**FROM:** Daniel A. Nerad, Superintendent

**RE:** Annual Enrollment Report - School Enrollments and Capacities 2010

---

**I. Introduction**

- A. Title/topic** – Annual Enrollment Report - School Enrollments and Capacities 2010
- B. Presenter/contact person** –  
Susan Abplanalp, Deputy Superintendent  
Tim Potter, Research Analyst
- C. Background information** – Attached to this memo are several items related to enrollments, both actual and projections, as well as school capacities. We also include data on the enrollment data for students on the basis of their residence.
- D. BOE action requested** – None at this time

**II. Summary of Current Information**

**A. Provide summary** –

The first attachment is a one-page overview summary of the past five years of enrollment history, the current year enrollment, and five years of projected enrollment by grade level. Overall, enrollment is generally flat for the district as a whole. However, enrollment has increased slightly for the past two (2) years. We project that this increase will continue for the next two years through 2012-13. After 2012-13 District overall enrollment K-12 will begin to decline slightly. Overall District enrollment has been remarkably stable since 1992 (minimum = 23,556 in 1992, maximum = 24,962 in 1998, average of 24,426 over the past 20 years).

By level, we project that only middle schools will continue to see increases in enrollment during the next five years whereas high and elementary schools will decline in enrollment. Elementary enrollments five years out are based largely on births 5 years prior. Births were at historical highs from 2004 to 2007 (over 3100 births in the City of Madison in each of those years, the highest since the mid 1960's). Births declined in 2008 (-8%) and 2009 (-13%) respectively from the 2007 high.

The second attachment shows the detailed K-12 enrollment history and projections for each school. Actual enrollment is displayed for 2006 to 2011. Projections are through 2015-16. Projection years are boldfaced. The precision of projections at a school level and for specific grade levels within a school are less accurate when compared to the district as a whole. Furthermore, projections are much less reliable for later years in the projection timeline. Also, the worksheet reflects various program and boundary changes that were implemented and this accounts for some large shifts within schools and programs from one year to the next.

The third attachment contains two sheets – one for elementary and one for middle and high combined – and details the maximum capacities for each school, the current enrollment and capacity percentage, and the projected 2015-16 enrollment and capacity percentage. The sheets are organized by attendance area. Summaries are provided for levels. From the data, it appears elementary schools that have long term capacity constraints include Allis/Nuestro Mundo, Kennedy, Glendale, and Van Hise. Among middle schools, Jefferson Middle School and Hamilton Middle School (paired with Van Hise which also has long term capacity concerns) may experience capacity concerns. None of the high schools are expected to have capacity issues for the foreseeable future.

The final attachment contains three sheets and displays the number of students residing in each attendance area (noted as the “Boundary” school along the columns at the top of each sheet) relative to the actual schools in which they attend. As you will note, the majority of students attend their school of residence, or “home” school. These figures are found along the diagonal on the worksheet from upper left to lower right. Across the district, about 12 percent of elementary students, 11 percent of middle school students, and 11 percent of high school students (not including the optional high school attendance area) attend a school other than their residence or “home” school. Obviously, the rate differs on a school by school basis. In general, these rates fall between 5 and 20 percent except where certain program-based assignments are in effect, e.g., ESL services.

**B. Recommendations and/or alternative recommendation(s) – N/A**

**C. Link to supporting detail – N/A**

### **III. Implications**

**A. Budget** – Aid to schools may change if space alterations are needed, if boundary changes are needed, are some of the implications.

**B. Strategic Plan** – 4K is tied to the Strategic Plan which may affect space.

**C. Equity Plan** – N/A

**D. Implications for other aspects of the organization** – Space issues at schools are affected by projections. If 4K is implemented in the 2011-12 school year, these documents will be used to identify school sites.

### **IV. Supporting Documentation**

**A. Enrollment Summary: History + Forecast 2005-06 through 2015-16**

**B. Enrollment History 2006-2011 and Projections 2012-2016**

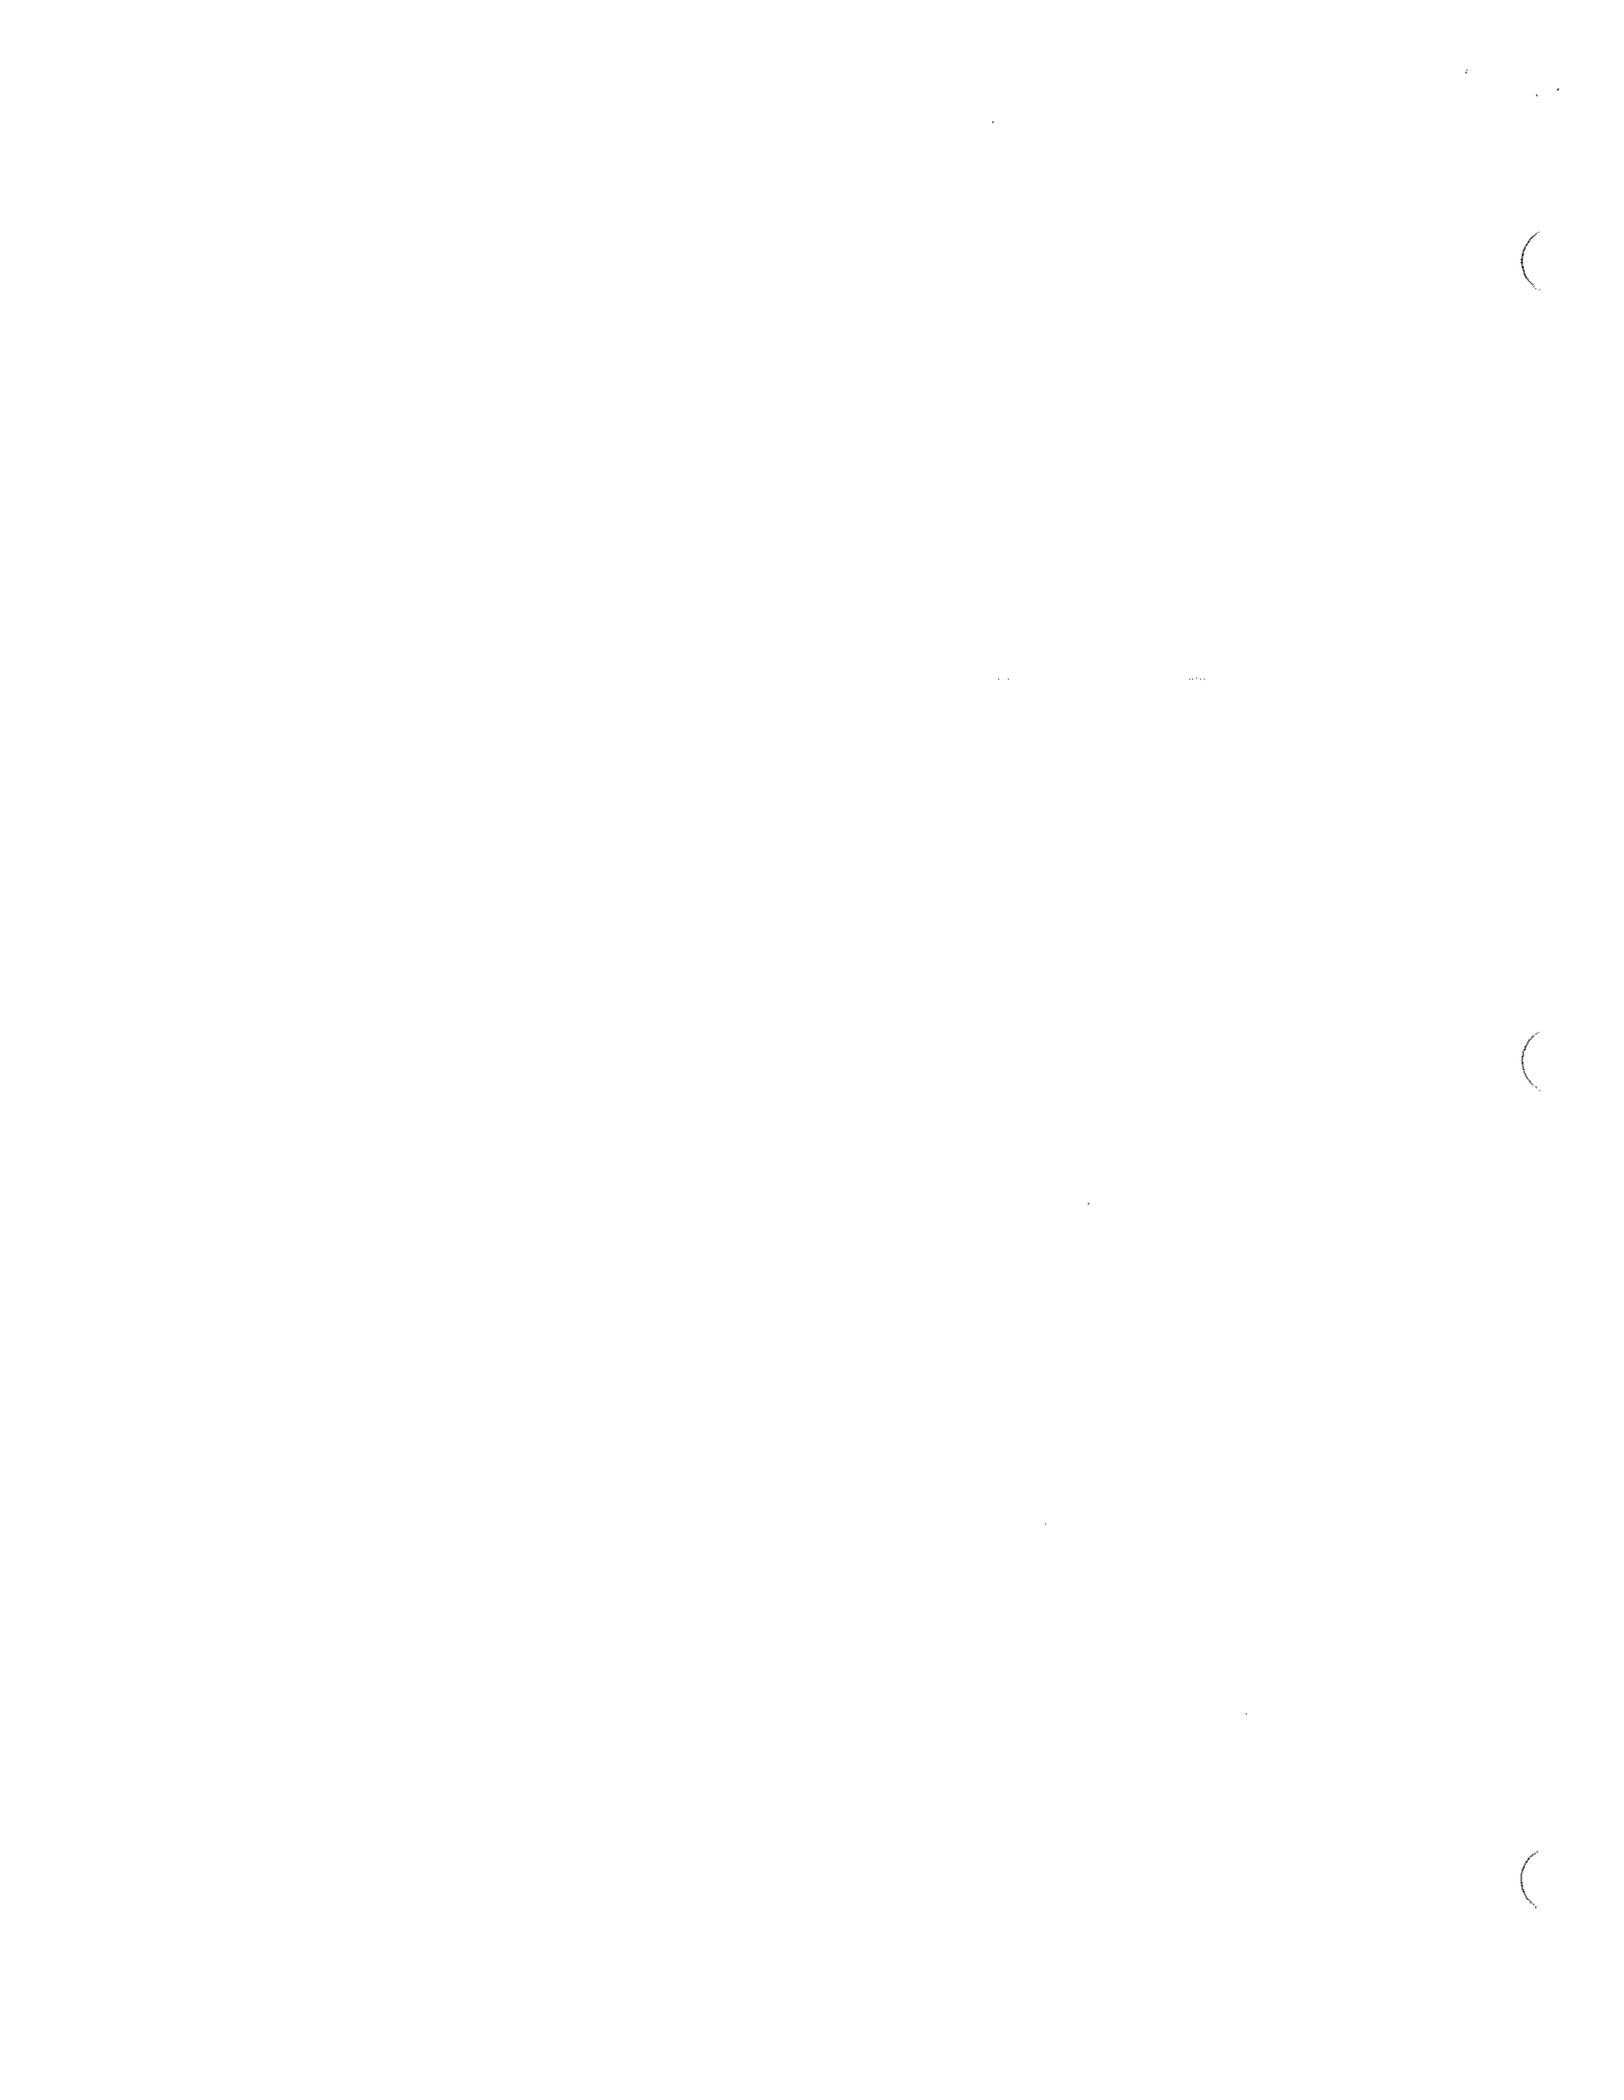

**C. Elementary Maximum Capacity Ranges by Area**

**D. Middle and High Maximum Capacity Ranges by Area**

**E. Number of Students Residing in Each Area and the Schools They Actually Attend**

**History + Forecast**  
**Madison Metro School District**  
**Excludes PK Students**

**Grades 6-8 Students Live/Attend Boundary Comparison**

This analysis compares attendance boundary by school of attendance. Some students are attending outside of their boundary due to program reassignments. Spring Harbor attendance area is Memorial and Wright Middle attendance area is West.

Third Friday September 2010 (2010-2011 School Year)

Attendance School	Boundary													Total School Enrollment	Students Enrolled in the School from Areas Outside the School Zone (Non-Resident Enrollees - Transfers In)	Non-Resident Enrollment (Transfers In) as Percent of Total School Enrollment	Total Transfers In plus Total Transfers Out	Total In and Out Transfers as Percent of Total School Enrollment (Transfer Rate)	Net Transfer In from Transfer Out	Net Transfer In from Transfer Out as Percent of Total School Enrollment (Net Transfer Rate)
