## Enrollment History and Projections Fall 2016

#### **Key Findings**

- 1. The 2016-17 KG-12 enrollment of 25,239 is an increase of 8 students from the 2015-16 enrollment of 25,231.
- 2. We project slight enrollment increases over the next five years, leading to a projected KG-12 enrollment of 25,482 for the 2021-22 school year.

This report contains a brief enrollment history on the Third Friday of September, the first official enrollment count of the year for MMSD, as well as projected enrollments for the next five academic years. This report also contains an appendix highlighting a change in our projection methodology to account for DLI student attendance patterns.

#### Background

Enrollment projections in MMSD are based on historical enrollment patterns and progression rates from grade to grade.

Kindergarten classes are projected by comparing local historical births against Kindergarten class sizes to determine what percentage of births we can expect to enroll in MMSD as Kindergarteners. Historical births by year at the municipal level come from the Wisconsin Department of Health Services (DHS); at the time of writing this report the most recent data is for 2014. A linear-forecast of births at the municipal level is used to extend live-birth estimates through 2017, covering the five-year projection period.

Projections do not formally take into account future residential developments. Projecting the number of students who will live in a yet-to-be-built building or residential area is extremely difficult to do with any degree of reliability because it is uncertain how many children will move in, when they will move in, and where they will have moved from. New construction does not necessarily mean that MMSD enrollment will increase; instead, students may simply move from other parts of the district. In addition, housing and employment patterns are subject to random and unpredictable variance at small scales, so implying that we can make these kinds of projections reliably would be irresponsible. When future large-scale development in an area is relatively certain this information is used for planning purposes on a case-by-case basis, particularly in conversations around school capacity and long range planning. Instead, we monitor residential development separately and plan according to the expected future number of students.

Projected Kindergarteners are assigned to elementary schools based on a three-year average of the distribution of Kindergarteners. Subsequent grades are projected based on a three-year average of the grade-to-grade persistence rates, with fifth and eighth grade students distributed to sixth and ninth grade schools based on the prior year's pattern of enrolling at each middle and high school during the current year. This methodology conforms to best practices across school districts according to a 2013 study of enrollment projection methodology conducted for MMSD by Hanover Research.

The enrollment progression rates and distribution rates from grade to grade and school to school are calculated and applied separately for DLI and non-DLI students entering first through twelfth grade. The English Language Learner Three-year Plan is increasing the number of schools offering DLI learning environments, affecting attendance pattern dynamics when students transition from one school level (e.g. a elementary school) to the subsequent level (e.g. a middle school). See Appendix A for additional detail about the treatment of DLI and non-DLI students in the projection.

The progression rate for twelfth grade is decomposed into an 11<sup>th</sup>-to-12<sup>th</sup> grade progression rate and a 12<sup>th</sup>-to-12<sup>th</sup> grade progression rate, where the 12<sup>th</sup>-to-12<sup>th</sup> grade progression rate represents students repeating as twelfth graders. The twelfth grade rate is decomposed into two rates to account for a change in practice to having students who are credit deficient repeat twelfth grade instead of being retained as eleventh graders, which was the practice before the 2015-16 school year.

**KG-12 Enrollment History and Projection** 

The 2016-17 KG-12 enrollment of 25,239 students is an increase of 8 students (0.03%) from the 2015-16 enrollment of 25,231 students. KG-12 enrollment in MMSD has remained relatively flat for the last five years, increasing by fewer than 500 students. We project that MMSD will continue a trend of modest growth for the next five years.

#### By Grade and Level

Birth rates declined from 2008 to 2010 during the Great Recession and have steadily increased each year since. Middle and high school enrollments are likely to continue to increase in the short term as the larger elementary school enrollments continue onto later grades. In addition to the KG-12 students listed above, a total of 1,808 students are enrolled in MMSD 4K and Pre-K programs (counts by location are listed after projections on page 10).

Over the past five years the number students and the percent of the student population identifying as Hispanic or Latino has steadily grown. Also, the number of students and the percent of the student population identified as low-income or an English Language Learner has increased. We do not produce projections based on demographic characteristics.

### **Projection of Charter and Alternative Schools**

At the middle school level, Badger Rock, Spring Harbor, and Wright have modified projections for their sixth grade. Since their charters or school policy guides specify specific numbers of students they can enroll, the projection is set as follows:

Badger Rock: The charter effective for the 2016-17 school year specifies that Badger Rock may serve up to 100 students enrolled across grades six, seven, and eight. Their projection is therefore capped at 100 students for the entire school and their sixth grade projection is 35 students to conform to enrollment expectations.

Spring Harbor: The school enrollment policy for the 2016-17 school year specifies that up to 90 students may enroll into Spring Harbor's sixth grade. Their sixth grade projection is therefore 90 students.

Wright: The charter effective for the 2016-17 school year specifies that Wright may enroll up to 85 students in sixth grade and may serve up to 255 students across all grades. The projection for sixth grade and the school is therefore 85 and 255, respectively.

The difference between what the projection methodology expects and these Charter and policy rules state are handled by modifying the projections of all schools to properly redistribute students according to the current school year's distribution.

At the high school level, Capital High (formerly Innovative & Alternative), Metro, and Shabazz enrollments are projected in the same manner as other high schools. These projections should be seen as more open to variance since at lower grades (9<sup>th</sup>, 10<sup>th</sup>, and 11<sup>th</sup>) enrollments are relatively small and fluctuate widely and for 12<sup>th</sup> grade the enrollment number increases greatly as students repeat twelfth grade, transfer from traditional high schools, and enter from outside the district. It is difficult to project this process because it depends on non-typical enrollment patterns and a disproportionate share of these students are not enrolled as eleventh or twelfth graders during the previous school year. The projection methodology smooths this process by assuming that the recent distribution of students across high school grades will hold, therefore students are redistributed between high schools to ensure that school projections conform to recent evidence of enrollment patterns.

### 4K/PK Enrollment by Site

Our enrollment reports generally focus on students in grades K-12. However, we also enroll nearly 2000 students in 4K/PK programs. The tables below show 4K/PK enrollment by site for the 2016-17 Third Friday count and a recent history of 4K/PK enrollment at the district-level. We do not produce location-level enrollment projections for 4K/PK because enrollment at the location level is dependent upon programmatic decisions at the district level and parental decisions and not on attendance boundaries.

### Appendix A: Projection of DLI and non-DLI students

As indicated earlier in this report, MMSD's enrollment projection methodology has been updated to account for students participating in Dual Language Immersion (DLI) learning environments.

The two processes that have been modified are the progression rates from a grade to the subsequent grade and the distribution rates of students between schools at transition points. The modification of the progression rates has a small effect on the projection caused by the changing mix of DLI and non-DLI students. The modification of distribution rates has no effect for most schools and a large impact for some school attendance patterns that have new DLI programs.

#### Progression rates from grade-to-grade

The progression rates from grade-to-grade are relatively similar for DLI and non-DLI students. The average for DLI students at the elementary school level is 96% and at the middle school level it is 101%, while for non-DLI students it is 97% and 98%, respectively. For high school grades the regular student progression rates were used because the DLI student population is too small to build reliable rates.

#### **Distribution rates between schools**

The distribution of students between schools (e.g. distributing projected sixth graders to middle schools based on fifth graders and their elementary schools) are substantially different for DLI and non-DLI students in some cases. These rates are based on the end of year student count, the Third Friday of September student count and whether or not the students participated in DLI during the end of year count school year.

The observed rates between elementary schools with fifth grade students at schools with DLI programs into middle schools with DLI programs are listed here. Most of the differences in transition rates for DLI and non-DLI students are small but some are substantial and the updated projections take this observed reality into account. The effect of DLI expansion on attendance patterns is to increase the likelihood that students participating in DLI programming in elementary school are sometimes more likely to select a middle school with DLI programming then are elementary students not participating in DLI programming.

As an example, Leopold has both students participating in DLI and non-DLI learning environments. The fifth grade DLI population at Leopold continued onto Cherokee (a DLI middle school) 76% of the time while the non-DLI population continued onto Cherokee only 60% of the time. In our projection, an increase in Leopold's DLI population will lead to an increase in Cherokee's projected enrollment because Leopold DLI students are more likely than non-DLI students to attend Cherokee.

| End of Year   | September | DLI Student              | Regular Student          |            |
|---------------|-----------|--------------------------|--------------------------|------------|
| School        | School    | <b>Distribution Rate</b> | <b>Distribution Rate</b> | Difference |
| Glendale      | Sennett   | <b>9</b> 5%              | 94%                      | 0%         |
| Leopold       | Cherokee  | 76%                      | 60%                      | 16%        |
| Leopold       | Sennett   | 5%                       | 2%                       | 3%         |
| Leopold       | Sherman   | 0%                       | 2%                       | -2%        |
| Lincoln       | Cherokee  | 63%                      | 26%                      | 37%        |
| Lincoln       | Sennett   | 0%                       | 4%                       | -4%        |
| Lincoln       | Sherman   | 0%                       | 2%                       | -2%        |
| Nuestro Mundo | Cherokee  | 2%                       |                          |            |
| Nuestro Mundo | Sennett   | 93%                      |                          |            |
| Sandburg      | Cherokee  | 0%                       | 3%                       | -3%        |
| Sandburg      | Sennett   | 0%                       | 3%                       | -3%        |
| Sandburg      | Sherman   | 97%                      | 83%                      | 14%        |

Since the ELL Three-year Plan is only in its second-year, the effects of DLI expansion at schools will not be fully realized for several more years. Where observed distribution rates for schools are not available because it is the first year the program exists or program expansion is planned for future years in our five-year projection we have used the regular student distribution rates. As more evidence on DLI and non-DLI attendance patterns accumulate our ability to project enrollment will improve.
