

BOE WEEKLY UPDATE

April 9, 2026

Dear Board of Education Members,

This week marked a significant transition for our district as we moved into the fourth quarter of the academic year. Beginning the final stretch of the school year always brings a unique blend of urgency and celebration. On Monday, while our students were away, our dedicated staff engaged in a Staff Only Day, focusing on the professional development and planning necessary to ensure every student finishes the year strong. It is these moments of collective focus that reinforce our commitment to excellence and equity across all Madison schools.

A major theme of my week has been collaborative governance and community partnership. From meeting with the Greater Dane County School District Governance Consortium to regular check-ins with Madison Teachers Inc. (MTI), I am reminded that the strength of MMSD lies in our ability to listen and lead together. Whether discussing immigration planning with our internal teams or hearing from parents in our schools, our goal remains clear: creating a safe, welcoming, and high-achieving environment for every child we serve.

Monday, April 6

- **Staff Only Day:** No school for students as staff engaged in professional development and end-of-year planning.
- **Internal Immigration Planning:** Met with the planning team to review district protocols and support systems. We shared feedback from spring travel that members of our team experienced or received via feedback from some of our student groups traveling.
- **Instruction Work Group:** Participated in the evening work group session at the Doyle Administration Building to Strategic Partnerships and a Summer Learning preview.

MSCR Mission

To enhance the quality of life for individuals in the Madison Metropolitan School District and for the community by providing recreation and enrichment opportunities year-round that are accessible to all.

Dear Madison Community,

Welcome to our milestone season! As you flip through the pages of this program guide, you may see a list of activities, but behind that list of activities is a celebration of a century of community in motion.

MSCR is incredibly proud to celebrate our Centennial. Since 1926, our mission has been to provide access to spaces and programs for community members of all ages to explore, be active, learn, connect and find a place to belong. While Madison has changed greatly over the last hundred years, our core belief remains the same: high-quality recreation is essential to a healthy, vibrant life.

To mark the MSCR Centennial, we're infusing our history and a century of play throughout our summer programs. Look for special activities and themes throughout this program guide and the rest of the year. We hope to see you at one of the Art Cart's 100 stops or doing 100 reps of your favorite exercise in a fitness class, or learning the history of our lakes on a pontoon boat ride.

This anniversary isn't just about MSCR; it's about YOU! You. Whether you learned to swim in our pools decades ago, played on a softball team with generations of family members, attended summer camp as a child, or you're joining your very first yoga class this week, you are part of our story. We are here because of your support, your joy, and your participation.

As we look toward the next 100 years of fun, we remain committed to excellence and recreation for all. Thank you for being the best part of our history.

Let's make this a year to remember.

Sincerely,
Mary Roth, MSCR Executive Director

Dear Families & Community Members,

In 1926, MSCR offered its doors with a simple focus: serving the Madison community in the areas of health, fitness, and wellness. A century later, MSCR has evolved offering a variety of accessible year-round recreation and enrichment opportunities for all - camps and afterschool programs, arts and enrichment, aquatics, outdoor activities, day trips and more.

To celebrate its 100 years of service, several community centennial events will be held throughout the summer. As you flip through this program, look for these notable additions centered on five key themes:

- 100 Years of Fun
- 100 Years of Community Impact
- 100 Years of Recreation
- 100 Years of Growth
- 100 Years of Opportunity

I encourage you, as well as your family and friends, to join us at these events. Your participation is key to MSCR's growth and success, and whether you're signing your child up for their first summer camp or joining a fitness program yourself, you are part of a 100-year legacy of excellence. Let's make this summer the best one yet.

In partnership,
Joe Gothard, Ed. D., Superintendent

I want to draw your attention to the MSCR program guide distributed late last month. This demonstrates the robust, decades-long relationship between MMSD and MSCR. While we maintain separate summer guides due to the specific operational capacities required for our respective programs to flourish, we work side-by-side. This synergy makes MMSD stand apart in the depth of learning and well-being opportunities we provide to both children and adults in Madison.

- **New Series Launch: "The Voices of People, Purpose and Pride":** I am thrilled to share the first edition of this new series. These informal, less-scripted conversations aim to pull back the curtain on MMSD decision-making. Our first episode features guest **Bob Soldner** for a deep dive into the MMSD budget, state funding, property taxes, and the systemic need for school funding reform.

Tuesday, April 7 (Start of 4th Quarter)

- **Voter Participation:** Started the day by heading to the polls for the local elections. Congratulations to Board Members Vander Meulen and Mosner Feltham! To give you sense for how WI school districts fared in their referenda pursuits, here is the DPI results webpage:
<https://sfs.dpi.wi.gov/wisfpr/SchoolDistrictReferendaReport?moduleId=11>
- **Principal Advisory Committee:** I met with a group of principals and assistant principals at Doyle. The role of the principal in MMSD has changed dramatically in recent years, becoming more complex and demanding. This committee provides me with a direct "front-line" feedback loop that pushes me to find new, innovative ways to support our leaders and school communities.

BOE WEEKLY UPDATE

Wednesday, April 8

- **Madison Public Schools Foundation (MPSF):** Attended the virtual board meeting to discuss community fundraising and grant opportunities for our teachers. There is always a great deal going on at the foundation. I was grateful the MPSF played such a prominent role at our groundbreaking ceremonies. We have a big spring event coming up at the end of the month and next week I will take part in interviews for the new President.
- **Academic Affairs Committee:** Participated in the monthly committee meeting focusing on student achievement data and instructional goals in my role as a Trustee at Edgewood University. So many of these conversations are PreK-14 or 16, thinking about the many ways we prepare children for success.
- **Downtown Rotary:** Our rotary meeting featured an excellent presentation on Autism from [Dr. Qiang Chang](#) from the Waisman Center. I will share the video link with you once it is posted.

Thursday, April 9

- **GMCC ICE Breaker:** Represented MMSD at the Greater Madison Chamber of Commerce event at the Kohl Center, strengthening our ties with local business partners. The theme of the event was: **Ready, Set, BECOME.** Madison and Dane County truly have potential and opportunities like few other cities across the country. I continue to align our Building for the Future work with this understanding about our growth and economy.
- **Board Preparation:** Dedicated time to reviewing the upcoming Board of Education (BOE) packet and finalizing reports.

Friday, April 10

Personal Note: I am out of the office today visiting family. I look forward to returning recharged for the busy weeks ahead.

Joe

Joe Gothard, Ed. D

BOARD OF EDUCATION QUESTIONS

During our Instruction Work Group on April 6, 2026, we received the following questions from Board Members. Below are the questions and their responses:

- **Where can the board members see all the MOA's of our high and medium intensity partnerships?**

We currently do not have a public-facing database to view all partnerships in one place. The Board receives weekly updates on all medium-intensity partnerships below the \$ 60,000 threshold. The Board received a memo on these in the fall. The BOE approves all high-intensity partnerships during the monthly regular Board meeting. We are currently working on a database/dashboard to provide visibility into all partnerships in one place. We continue to work within our repository system to create a simplified way to gauge the medium and high-intensity partnerships that can be shared broadly.

- **Do you have data that would speak to students that have IEPs that are attending summer school programs?**

*4K-12th grade enrollment for students with an IEP (not ESY)
2025: 771
2024: 593
2023: 574*

*Extended School Year (ESY) Enrollment
2025: 236
2024: 241
2023: 239*

OTHER INFORMATION**Achievement Gap Reduction (AGR) Program Reporting**

Please see the attached memo for an update on Achievement Gap Reduction schools progress towards achieving performance objectives.

**Analysis of Student Screen Time and Chromebook Integration**

Please see the attached memo for the analysis of student screen time and Chromebook integration.

Great Things Happening Around MMSD

- West High School's Civics Club [hosted eight candidates](#) vying to be the next governor of Wisconsin for student-led Q&A sessions, giving students a powerful platform to engage directly in the democratic process
 - Madison West High School students host Democratic candidates for town hall ([Wisconsin Examiner](#))
 - Madison West High School students host gubernatorial candidates ([Channel 3000](#))
 - Madison high school students talk to November election candidates ([WMTV](#))
- Lake View Elementary fifth-graders in the Hmong Heritage Bilingual program [honored history and language](#) by interviewing community elders about their lived experiences during the Vietnam War
- East High School staff enjoyed a heartwarming Professional Development Day visit from the Green County Humane Society, which brought some welcome [puppy love](#) to campus
- La Follette High School hosted a joyful [community choir celebration](#), featuring standout performances from students across its feeder schools
- 41 MMSD students advanced to [National Merit Finalist status](#), earning national recognition for their academic excellence, leadership and dedication
- As part of its efforts for Better World Day, Toki Middle School students have [partnered with their younger counterparts](#) at Orchard Ridge Elementary, creating bookmarks for visitors to nearby Meadowridge Library, designing and decorating bricks for Toki's rain garden, and creating May Day baskets that they'll share throughout the neighborhood surrounding their building
- Cherokee Heights Middle School eighth-graders showcased their reading skills and teamwork during the school's annual [Book Bowl](#), demonstrating strong comprehension skills and a love of literacy

OUR UPCOMING BOARD CALENDAR

Mon., April 13, 5 p.m.

Operations Work Group Meeting
In person and virtual—Open to the public

Wed., April 15, 5:30 p.m.

Student Senate
In Person – Doyle 103

Fri., April 17, 10 a.m.

Policy Committee
In Person

Mon., April 20, 5 p.m.

Special Meeting in Open Session – WORKSHOP
followed by Closed Session
In person and virtual—Open to the public

Mon., April 27, 6 p.m.

Regular Board of Education Meeting
In person and virtual—Open to the public

BOE WEEKLY UPDATE

- Wed., April 29, 5:30 p.m. Student Senate
In Person – Doyle 103
- Fri., May 1, 10 a.m. Policy Committee
In Person

State and Federal Programs

TO: Members of the Board of Education

FROM: Jennifer Waldner, Executive Director, State & Federal Programs

DATE: April 27, 2026

SUBJECT: Achievement Gap Reduction (AGR) Program Reporting

Issue:

The Madison Metropolitan School District (MMSD) is requesting the Board of Education's review of the implementation and progress towards achieving performance objectives in each participating Achievement Gap Reduction (AGR) school.

Background:

The 20 AGR schools in MMSD are required to follow one of three strategies in their K-3 classrooms as defined by the program. These strategies include class size reduction, instructional coaching, or one-to-one tutoring in math or reading. In MMSD, all AGR schools are required to either follow AGR class-size requirements of 18:1 or implement an instructional coaching strategy in classrooms where class sizes are higher. In return, DPI provides state aid that must be used to satisfy the terms of the AGR program requirements. One of these requirements includes reporting to the Board of Education at the end of each semester the school's success in attaining the performance objectives.

Analysis:

Attached you will find information regarding each school's implementation of the contract requirements, its performance objectives, and its success in attaining the objectives.

Anana Elementary

ACHIEVEMENT GAP REDUCTION (AGR) DATA-KEEPING TEMPLATE to support application and reporting

The table below will help you draft your responses for the contract application and collect information required for program evaluations and reports to your school board. Make sure your performance objectives for each grade relate to reducing achievement gaps in math and reading. They must be specific, measurable, and achievable.

- AGR Dropbox
- Important dates
- AGR legislation: [Wis. Stat. § 118.44\(4\)](#)
- AGR website

Use these columns to draft responses for the AGR contract application:

Grade	Subject	Baseline Performance Level	Performance Objective – (expected student growth)	Assessment Methods (formative & summative assessments)	AGR Strategy (class size reduction, instructional coaching, or one-to-one tutoring)	Rationale (Describe how the implemented strategy will help achieve the performance objective)	At the end of the semester, describe your progress for school board reporting:	Fall Semester Progress Toward the Objective (include the number of identified students meeting the objective)	Spring Semester Progress Toward the Objective (provide any performance data from the time before schools closed)

Use these columns to draft responses for the AGR contract application:							At the end of the semester, describe your progress for school board reporting:	
Grade	Subject	Baseline Performance Level	Performance Objective – (expected student growth)	Assessment Methods (formative & summative assessments)	AGR Strategy (class size reduction, instructional coaching, or one-to-one tutoring)	Rationale (Describe how the implemented strategy will help achieve the performance objective)	Fall Semester Progress Toward the Objective (include the number of identified students meeting the objective)	Spring Semester Progress Toward the Objective (provide any performance data from the time before schools closed)
K	Reading	59% at or above benchmark on aimsweb early reading	1.25 years	Aims early reading sub tests, FastBridge-Spanish, Benchmark advance, EL embedded assessments, daily tasks, encoding assessments	Class Size Reduction	Class Size Reduction allows for more direct student support and targeted teaching and learning opportunities	43% at or above benchmark on aimsweb early reading	
	Math	46% at or above benchmark on FastBridge early math	1.25 years	FastBridge Math screeners, Bridges Screeners, check points, interim assessments and daily tasks	CSR Size Reduction	Class Size Reduction allows for more direct student support and targeted teaching and learning opportunities	49% at or above benchmark on FastBridge early math	
1	Reading	65% at or above benchmark on aimsweb early reading	1.25 years	Aims early reading sub tests, FastBridge-Spanish, Lexia, Benchmark advance, EL embedded	Class Size Reduction	Class Size Reduction allows for more direct student support and targeted teaching and learning opportunities	58% at or above benchmark on aimsweb early reading	

				assessments, daily tasks, encoding assessments				
1	Math	80% at or above benchmark on FastBridge early math	1.25 years	FastBridge Math screeners, Bridges Screeners, check points, interim assessments and daily tasks	Class Size Reduction allows for more direct student support and targeted teaching and learning opportunities	50% at or above benchmark on FastBridge early math		
2	Reading	51% at or above benchmark on aimsweb oral reading fluency	1.25 years	Aims, FastBridge-Spanish, Lexia, Benchmark advance, EL embedded assessments, daily tasks, encoding assessments	Class Size Reduction allows for more direct student support and targeted teaching and learning opportunities	44% at or above benchmark on aimsweb oral reading fluency		
2	Math	35% at or above benchmark on FastBridge aMath	1.25 years	FastBridge Math screeners, Bridges Screeners, check points, interim assessments and daily tasks	Class Size Reduction allows for more direct student support and targeted teaching and learning opportunities	33% at or above benchmark on FastBridge aMath		
3	Reading	73% at or above benchmark on aimsweb oral reading fluency	1.25 years	Aims, FastBridge-Spanish, Lexia, Benchmark advance, EL embedded assessments, daily tasks, encoding assessments	Instructional Coaching provides opportunities for staff to engage in the teaching and learning cycle through reflection and adjustments. All this impacts student outcomes.	71% at or above benchmark on aimsweb oral reading fluency		

3	Math	42% at or above benchmark on FastBridge aMath	1.25 years	FastBridge Math screeners, Bridges Math screeners, Screeners, check points, interim assessments and daily tasks	Instructional Coaching	Instructional Coaching provides opportunities for staff to engage in the teaching and learning cycle through reflection and adjustments. All this impacts student outcomes.	38% at or above benchmark on FastBridge aMath

your school board. Make sure your performance

At the end of the semester, describe your progress for school board reporting:

describe your progress for school board reporting:
Spring Semester Progress Toward the Objective
 (provide any performance data from the time before
 schools closed)

			spring benchmark will increase 3% as measured through the AimsWeb screener. (10% over 3 years- SIP)		student relationships and therefore student engagement.	student's academic performance reflects deficiencies in effort or understanding and respond accordingly. This leads to improved test outcomes, reduced grade retention and drop-out rates.	47 students out of 61	
1	Math	78%	The amount of students reaching proficiency in reading by spring benchmark will increase 3% as measured through the AimsWeb screener. (10% over 3 years- SIP)	Fastbridge Screener, curriculum embedded assessments, district interim assessments	The class size reduction strategy will be utilized to attain the performance objectives. Smaller classes result in improved teacher /student relationships and therefore student engagement.	Higher expectations are easier to maintain when teachers know their students well. Teachers can then identify whether a student's academic performance reflects deficiencies in effort or understanding and respond accordingly. This leads to improved test outcomes, reduced grade retention and drop-out rates.	63% 37 students out of 60	
2	Reading	62%	The amount of students reaching proficiency in reading by spring benchmark will increase 3% as measured through the AimsWeb screener. (10% over 3 years- SIP)	AimsWeb Screener, curriculum embedded assessments	The coaching strategy will be utilized to attain the performance objectives	Focused coaching that includes professional learning aligned to SIP goals through observation, feedback, and reflection strengthens instructional practices, builds teacher capacity, and leads to improved student engagement and outcomes.	64% 40 students out of 63	
2	Math	55%	The amount of students reaching proficiency in reading by spring benchmark will increase 3% as measured through the AimsWeb screener. (10% over 3 years- SIP)	Fastbridge Screener, curriculum embedded assessments, district interim assessments	The coaching strategy will be utilized to attain the performance objectives	Focused coaching that includes professional learning aligned to SIP goals through observation, feedback, and reflection strengthens instructional practices, builds teacher capacity, and leads to improved student engagement and outcomes	53% 32 students out of 60	
3	Reading	82%	The amount of students reaching proficiency in	AimsWeb Screener, curriculum embedded assessments	The coaching strategy will be utilized to attain the performance objectives	Focused coaching that includes professional learning aligned to SIP goals through observation,	73% 49 students out of 67	

			reading by spring benchmark will increase 3% as measured through the AimsWeb screener. (10% over 3 years-SIP)			feedback, and reflection strengthens instructional practices, builds teacher capacity, and leads to improved student engagement and outcomes		
3	Math	63%	The amount of students reaching proficiency in reading by spring benchmark will increase 3% as measured through the AimsWeb screener. (10% over 3 years-SIP)	Fastbridge Screener, curriculum embedded assessments, district interim assessments	The coaching strategy will be utilized to attain the performance objectives	Focused coaching that includes professional learning aligned to SIP goals through observation, feedback, and reflection strengthens instructional practices, builds teacher capacity, and leads to improved student engagement and outcomes	56%	37 students out of 66

Becky Kundert, Senior Executive Director of Curriculum and Instruction
Eric Benedict, Instructional Technology User Manager

DATE: April 8, 2026

SUBJECT: Analysis of Student Screen Time and Chromebook Integration

MMSD remains dedicated to bridging the digital divide while ensuring technology serves as a purposeful companion to high-quality instruction. Our commitment to the "Ignite" Technology Plan focuses on transforming learning by increasing access and developing 21st-century skills such as communication, collaboration, and critical thinking.

The Importance of Technology Integration

Educational technology is no longer a luxury but a fundamental necessity for preparing students for a workforce where digital literacy is paramount. Research and district implementation data demonstrate that Chromebooks empower our students through several key avenues:

- **Transforming Learning:** Adaptive online platforms personalize learning by adjusting the difficulty of activities in real time. This provides students with immediate feedback and contributes to increased student performance.
- **Building 21st Century Skills:** It is vital that our students cultivate robust 21st-century skills, digital literacy, and fluency. Equipping them to be critical consumers of technology will prepare them for the global market upon graduation.
- **Enhanced Collaboration:** Technology supports active learning by replacing outdated systems that promoted passive learning. Tools such as Google Workspace and other collaboration platforms facilitate direct engagement with the curriculum and enable interaction with global audiences, thereby enabling adaptive learning.
- **Educational Equity:** Technology integration serves as a powerful equalizer, ensuring that all students, regardless of socioeconomic background, have access to robust learning tools. This effectively bridges one aspect of the digital divide. Furthermore, it promotes inclusivity and accessibility, benefiting students with diverse needs.

Analysis of Recommended vs. Actual Usage

Student Level	Recommended Daily Usage for Core Content	Actual Observed Usage

Elementary School	• 4K: None • K: None • 1: None • 2: 10 min • 3: 25 min • 4: 25 min • 5: 30 min	• 4K: 0 • K: 9 minutes • 1: 15 minutes • 2: 26 minutes • 3: 37 minutes • 4: 39 minutes • 5: 50 minutes
Middle School	40 Minutes	120 minutes
High School	40 Minutes	90 minutes

Current internal data highlights a significant discrepancy between the district's recommended instructional usage and the actual daily screen time logged by students. While curriculum-specific requirements vary by subject, ranging from high-frequency use in Biliteracy and Mathematics to minimal digital footprints in Physical Education, the cumulative daily totals exceed our current guidelines.

Limitations of Aggregate Data

While the current metrics provide a high-level overview of district-wide trends, it is essential to acknowledge what the data **does not** capture regarding the nuances of classroom implementation.

- **Teacher-Led Instructional Variation:** The data reflect prescribed curriculum requirements but does not account for how individual teachers leverage technology to meet the specific needs of their classroom. Teachers often exercise professional judgment to supplement lessons with digital resources or, conversely, to pivot to analog instruction when students require a break from screens.
- **Individualized Student Usage:** The recorded "Actual Observed Usage" represents an average, which may mask the reality of the individual student experience. For example, a student utilizing adaptive learning platforms for personalized intervention may naturally record higher screen time than a peer who has already mastered the content.
- **Multimodal Learning Contexts:** Current tracking focuses on the duration the Chromebook is open (Screen Time). However, this does not distinguish between "active" use (collaborative writing or coding) and "passive" use (watching a video), nor does it capture intermittent device use within a single instructional block.
- **Homework and Extracurricular Demands:** The current analysis focuses primarily on core content during the school day. It does not yet account for the additional screen time required for homework, elective courses, or student-led research outside of the prescribed curriculum.

Strategic Challenges and Pitfalls

While technology acts as a powerful catalyst for growth, we must remain vigilant regarding its implementation to avoid common pitfalls.

- **Instructional Intentionality:** Instructional design must prioritize the learning objective, ensuring that the digital tool is intentionally chosen as the best way to achieve that outcome.

- **Balance with Hands-on Learning:** The goal of technology is to enhance the physical world, not to replace it. In subjects like science, it is critical that digital simulations complement, rather than replace, hands-on experimentation and small-group interaction.
- **Professional Learning:** Given the rapid pace of technological advancement, we must pivot from static, one-time workshops toward a model of sustained professional growth. We need to move beyond 'tool-based training' to provide purpose-driven embedded professional learning that treats technology as a catalyst for lesson design, not the destination.

Our goal is to ensure that technology is a high-impact, purposeful tool that truly enhances the educational experience for all learners, rather than allowing it to dominate or overshadow learning.
